PUBLIC SERVICE ANNOUNCEMENT:

The City of Crystal City is continuing to work diligently on trying to complete the work on our Elevated Water Tank. The Elevated Water Tank has been disinfected as of Saturday and is ready for use. The inspector for Utility services has instructed Public Works staff to fill up the tank and have it flushed into the drainage and/or to the streets as we have done previously.

We are advising residents with as much notice as possible that we will be filling up the tank on FRIDAY AFTERNOON after 3 pm through the evening. Please be advised of low water pressure during the filling of the elevated water tank while it is filled to capacity.

On MONDAY the Elevated Water Tank will be flushed into the drainage and/or to the streets. The Elevated Water Tank will then be filled to capacity. The City of Crystal City residents will experience low water pressure on this day, we expect it to be after 3 pm into the evening.

The City of Crystal City staff will collect samples on Tuesday and send them to the lab, pending the results on Wednesday we will then know if the Elevated Water Tower Tank is fully operational.

The City of Crystal City staff will continue their work and try to successfully complete the Elevated Water Tank project in the next week. We thank you for your patience and apologize in advance for any inconvenience we may cause during this time. If you have any questions you can contact City Hall at 830-374-3477.
